VR Hackathon

Poznań University of Economics and Business

June 17-19, 2018 – Poznań, Poland

About

The VR Hackathon is a community driven event bringing together people interested in developing innovative VR/AR solutions, having fun, and helping to build the future of immersive technologies. Co-organized by **Poznań University of Economics and Business** and based on the infrastructure of its unique **VR Lab**, the event provides an exploratory environment where disruption, innovation, and creative ideas are brought to life.

The event is a part of a series of VR hackathons organized by the **Web3D Consortium**. **The VR Hackathon** in Poznań is co-located with the **ACM Web3D 2018 Conference**, which gathers leading researchers, VR/AR technology providers and business users. The mix of business mentors and technical experts encourages innovative applications of VR/AR technologies.

Features

- Open to teams as well as individuals
- Unique mix of business and technical mentors
- Latest VR devices to test and win!
- Presentation in front of international VR/AR audience for the best teams
- Multiple business-driven tracks (e.g., engineering, architecture and medicine)
- Free entry, but limited seats
